Education

2018-Present	**B.S. Computer Science**
	University of Washington - Seattle, WA
	Expected Graduation: June 2021
	GPA: 3.92/4.0, Dean's List
	Relevant Coursework: Deep Learning, Machine Learning (outside UW), Data Structures and Parallelism, Data Management

Experience and Activities

Some Year	**Some GSoC Org**, Remote
	Google Summer of Code Student
	- Developed infrastructure for harmony playback, allowing for enhanced accessibility and ease of use
	- Designed, tested, and implemented algorithms for chord symbol playback, using mentor advice and user feedback to guide development
	- Wrote weekly blog posts to update users on project progress and demonstrate new features
	- Used and gained confidence in C++, Git, Qt, and GDB
2018-Present, 2007-2018	**Vietnamese Eucharistic Youth Movement**, Some Location
	Youth Leader (Previously Member)
	- Planned and delivered weekly lessons to classes of 8-20 students, attending weekly meetings with other youth leaders to handle chapter logistics
	- Trained and certified by national committee to teach classes and manage events
	- Helped to administer events with other youth leaders from the chapter level to the Pacific Northwest Region
	- Managed budgets and cash flow for division as 2018 Division Treasurer

Projects

Ongoing	**Open Source Contribution**
	MuseScore
	- MuseScore is an Open Source piece of music notation software, used to compose, notate, and engrave music
	- Working with C++, navigated over 1 million lines of code fixing bugs and implementing new features
	- Wrote over 27,500 additions for MuseScore across 20+ pull requests with 15 merged pull requests
	- Gained experience working with developers and users on a large codebase with code reviews and continuous integration
Ongoing (Paused)	**Open Applied Music Theory**
	Personal Book
	- Wrote a personal book to teach music theory in an applied setting
	- Written in LaTeX for typesetting with lilypond/lytex for music notation
	- Paused project in favor of working on MuseScore with hopes to return
2018	**Jamacarons**
	Business Website
	- Wrote a website for a macaron business
	- Uses HTML, SASS/CSS, and Javascript for the website which is hosted on GitHub pages at jamacarons.me
	- Written with hopes to explore web development
2016	**Blossom**
	Game Engine
	- Last of a series of game engines written for learning purposes
	- Used Java and LibGDX/LWJGL to allow for rendering with OpenGL
	- Implemented XInput device input framework, entity component system, and game state management system
